NEOLIBERALISM, POST-TRUTH POLITICS AND PROPENSITIES FOR VIOLENCE

DISCUSSION ADDRESSING **S.M. AMADAE'S PRISONERS OF REASON**

What is the relationship between neoliberal markets and governance, post-truth politics, and the potential decay into violent interactions? Where classical liberalism celebrated security from harm and truth as the bases for Enlightened government, how can we understand the early twenty-first century turn to increased socio-economic stratification and post-factual democracy?

Anu Koivunen, Risto Penttilä, Teivo Teivainen and Thomas Wallgren will respond to these questions in conversation with **S.M. Amadae**, author of **Prisoners of Reason** (Cambridge University Press, 2016).

An open forum discussion follows with moderated audience questions.
